GSPP OVERVIEW

GSPP SERVICES

GSPP provides services to the community in the form of GSPP Clinical Services, GSPP Forensic Services, and GSPP Counseling Services. No other school has the synergy GSPP has between clinical, forensic, and counseling programs and their respective clinics.

GSPP Forensic Services

- *Denver FIRST* serves as a regional hub for expertise in forensic mental health, including forensic mental health evaluations, outpatient competency restoration, immigration/asylum issues, juvenile justice, and forensic neuropsychology.

GSPP Counseling Services

- *The Center for Performance Excellence (CPEX)*, teaches mental skills that help athletes and performers achieve personal excellence, using performance as a vehicle for positive social change.

GSPP Clinical Services

- *The Professional Psychology Clinic (PPC)* is one of the largest training clinics in the country, providing low cost, high-quality psychological services to Denver and the surrounding communities.
- *The Caring for yoU and Baby (CUB) Clinic* trains students to support the mental health and developmental needs of pregnant and postpartum families with infants and young children.
- *The Sturm Center* provides direct clinical services to Veterans, Service members and their families. It is the only Veteran/military specific behavioral health clinic in the Denver Metro area that accepts clients from all Veteran and Service categories, helping to fill the gaps these populations often face.
- *The Trauma Disaster and Recovery Clinic (TDRC)* trains masters level students from the IDP Program to provide clinical services to those who have been impacted by trauma globally, such as childhood emotional, physical, and/or sexual abuse, natural disasters, political conflict, torture, domestic violence and/or sexual assault.
- *The Family Support Clinic* provides parent support group therapy and individual therapy to parents of an adolescent or young adult who is experiencing the challenges of a significant mental health condition.
